Intuition's Role in Strategic Decision-Making

Leaders are often presented with complex problems that require quick decision making in time-constrained, chaotic and high-risk environments.

The ability of leaders at all levels to quickly develop situational awareness based on an accurate assessment of the facts is critical to good decision-making, and ultimately determines the survival of companies and organizations.

Moving from theory to practice, Brigadier General (Ret.) Shan K. Bagby shares strategies to integrate intuitive thinking into leader development. Attendees will discover specific steps for developing pattern recognition skills and how to use intuition to make faster, better decisions with limited time and information.

LEARNING OBJECTIVES:

- Define intuition and who utilizes it
- Identify the connection between intuition, knowledge and expertise
- Understand how we are wired to make cognitive errors
- Outline the challenges of leading in a strategic environment
- Integrate intuitive thinking into leader development
- Develop improved thinking skills as a leader

SUGGESTED AUDIENCE:

Business Owner,
Management, Team Leaders

SUGGESTED FORMATS:

Partial Day; Keynote,
Lecture, Workshop

SHAN K. BAGBY, DMD, MHA, FACHE
